Serdar Tuna Bosdurmaz

Ankara, Turkey | +90 543 578 92 02 | tunabosdurmaz2002@gmail.com | LinkedIn | GitHub

Professional Summary

Software Engineer with 5+ years of experience building production-ready web, mobile, and backend applications across EdTech, AdTech, FinTech, Automotive, and Social Media. Experienced in delivering AI-powered platforms, SaaS products, real-time systems, and cross-platform mobile applications using React, React Native, Next.js, TypeScript, Node.js, NestJS, and Go. Contributed to products used by thousands of users and published applications to both the App Store and Google Play. Has used AI coding tools (Claude, Codex, ChatGPT) daily since 2023 to deliver faster and learn new codebases quickly.

Professional Experience

Senior Software Engineer Mar 2025 – Mar 2026
PREPTEST *Mersin, Turkey*

- Developed four production applications (two web and two mobile) within a 3-person engineering team, including **PrepTest**, an AI-powered international exam preparation platform serving more than **10,000 users**.
- Built learning experiences for SAT, IMAT, CENT-S, Bocconi, IELTS, and other international exams through adaptive study paths, AI-generated questions, exam simulations, and detailed reporting.
- Co-developed **Langium**, a TUBITAK-funded English learning platform featuring professional IELTS preparation, personalized study plans, and proficiency-based practice flows.
- Delivered frontend, backend, and mobile features using React, React Native, Next.js, TypeScript, Node.js, and NestJS, including authentication, push notifications, third-party integrations, and production releases.
- Used AI coding tools (Claude, Codex, ChatGPT) daily to speed up feature work, skip hand-written boilerplate, get past blocking issues, and understand unfamiliar parts of the codebase faster.
- Collaborated with product stakeholders to improve learning flows, user experience, and platform capabilities across web and mobile applications.

Mid Software Engineer Sep 2023 – Sep 2024
E-Adam / IYZADS *Antalya, Turkey*

- Developed an AI-powered advertising platform within a 4-person engineering team, enabling businesses to manage Google Ads, Meta Ads, and TikTok Ads from a unified product.
- Contributed to the core SaaS platform, a responsive marketing website, and a cross-platform mobile application for creating, managing, and optimizing digital campaigns.
- Implemented AI-assisted ad-copy generation, audience targeting, budget recommendations, campaign optimization, automation, analytics, and centralized reporting workflows.
- Integrated advertising platform APIs while building scalable frontend and backend features using React, React Native, Next.js, TypeScript, and Node.js.
- Developed the promotional website independently, including custom animations, Lottie performance optimizations, lazy loading, and responsive UI implementation.
- Used AI coding tools (Claude, Codex, ChatGPT) in daily development to reduce boilerplate work and ramp up quickly on a new codebase.

Junior Software Engineer (Contract) Feb 2023 – Jun 2023
WINNOWPRO *California, USA (Remote)*

- Independently developed the complete cross-platform mobile application for a US-based online vehicle marketplace supporting vehicle sales and rentals.
- Built customer, agent, and administrative workflows, including vehicle browsing, account management, and role-specific mobile interfaces.
- Integrated backend-provided AI chatbot conversations and implemented real-time customer-agent messaging with Socket.IO.
- Managed the end-to-end mobile release process and published the application to both the Apple App Store and Google Play Store.

Junior Software Engineer (Contract) Apr 2023 – Jun 2023
SOFTWAREHOUSE TECH *Istanbul, Turkey*

- Contributed within a 3-person engineering team to a React Native investment and stock-trading application.
- Developed portfolio management, wallet functionality, financial dashboards, and interactive market chart interfaces.
- Integrated backend APIs and improved application performance and usability across mobile devices.

Junior Software Engineer (Contract) Aug 2022 – Dec 2022
KARMA *Istanbul, Turkey*

- Contributed within a 4-person team to a production dating application available on mobile app stores.
- Implemented real-time messaging with Socket.IO and developed profile, matching, and horoscope-based compatibility features.
- Integrated backend APIs and delivered responsive mobile experiences using React Native and Redux.

Independent Software Engineer (Part-Time) Sep 2021 – Present
Freelance *Ankara, Turkey*

- Delivered paid web, mobile, and full-stack development support for startups and individual clients on a part-time basis.
- Built new features, integrated third-party APIs, resolved production issues, and improved existing applications using React, Next.js, React Native, TypeScript, and Node.js.
- Worked directly with clients to clarify requirements and deliver maintainable solutions within agreed timelines.

Software Development Intern Sep 2019 – Jun 2020
HALKBANK *Ankara, Turkey*

- Completed a mandatory high-school internship and contributed to basic internal C# development, debugging, and database-related tasks.
- Gained early exposure to enterprise software workflows, code reviews, documentation, and production support practices.

Projects

Giga Chad Wallet | *Next.js, React, TypeScript, Supabase, Privy, Solana*

- Built a completed cryptocurrency portfolio application with secure authentication, live market data, responsive asset views, and Solana wallet functionality.
- Implemented Privy authentication, Supabase-backed data flows, reusable UI components, and responsive interfaces with Next.js, React, Tailwind CSS, and shadcn/ui.

AI-Powered Interview Preparation Platform | *NestJS, PostgreSQL, Redis, BullMQ, Docker, Groq*

- Designed a modular backend for AI-assisted mock interviews with users, interview sessions, questions, answers, reports, caching, queues, and AI evaluation modules.
- Implemented JWT and Passport authentication, TypeORM persistence, Redis caching, BullMQ background jobs, Swagger documentation, and Groq Llama 3 answer evaluation.
- Added unit, integration, and end-to-end testing patterns while following a layered, maintainable architecture.

Boxing Gym Management API | *NestJS, PostgreSQL, Docker*

- Built a full gym-management backend covering members, trainers, memberships, payments, attendance, workouts, reports, statistics, and notifications.
- Implemented JWT authentication, role-based authorization, modular REST APIs, PostgreSQL persistence, Docker support, and automated tests.

Technical Skills

Languages: TypeScript, JavaScript, Go, Python, SQL
Frontend: React, Next.js, React Native, Expo, Tailwind CSS, Redux Toolkit, TanStack Query, React Hook Form, Zod, Framer Motion, shadcn/ui
Backend: Node.js, NestJS, Express.js, REST APIs, Socket.IO, JWT, Passport, TypeORM
Data & Messaging: PostgreSQL, MongoDB, Redis, Supabase, RabbitMQ, BullMQ
AI: Claude, Codex, ChatGPT (daily use since 2023), Anthropic and OpenAI SDKs, LLM API integration (Groq Llama 3)
Testing & Tooling: Jest, Cypress, Unit Testing, Integration Testing, E2E Testing, Swagger, Postman, Git, GitHub
DevOps: Docker, GitHub Actions, Firebase, App Store Connect, Google Play Console

Certifications

Anthropic (2026): Building with the Claude API, Model Context Protocol: Advanced Topics, Introduction to Model Context Protocol, Claude Platform 101, Introduction to Claude Cowork, Claude 101, AI Fluency for Students
TestGorilla (2026): React (99th percentile), Next.js (99th percentile), Coding: Intermediate Algorithms (90th percentile)

Education

Anadolu University 2022 – 2025
Associate Degree in Computer Programming *Turkey*

Languages

English: Professional Working Proficiency **Turkish:** Native
